

Propane System Installation PERMIT APPLICATION

- The installation of a Propane System shall not impair the operations of septic tanks, underground utilities, property drainage, or security fencing.
- Tank location must be approximately 80 feet from truck refueling location. Refueling trucks must be able to park off of public right of way. Railroad Commission rules state that the driver must maintain a clear line of sight between the truck and tank. Trucks should be kept on hard surfaced driveways and may not cross yards, septic lines or tanks.

Required Documentation for Application Approval:

- Site Plan
- Letter of Gas Availability from local natural gas provider documenting that natural gas service is not available at the property.

Contractor / Owner Information:
